General Education Philosophy Statement

An Associate Degree signifies more than an accumulation of units; it signifies the successful completion of a pattern of learning experiences designed to develop certain capabilities and insights that lead to the fulfillment of individual human potential. Therefore, in addition to the Basic Requirements for graduation relating to units, residency, and competency in reading, written expression, and mathematics, students must also satisfy General Education requirements as required by Title 5 of the California Education Code and by Ventura County Community College District Governing Board Policy. The philosophy underlying “general education” is that no discipline is an isolated endeavor; instead, each relies upon and contributes to a common body of knowledge, ideas, intellectual processes, cultural traditions, and modes of perception. One's understanding of a specific subject area is greatly enhanced and enriched by knowledge in and experience with other disciplines. Thus, the General Education requirements are designed to introduce students to the variety of means through which people comprehend the modern world and fulfill their potential and, in so doing, serve family, community, and society. The General Education requirements reflect the conviction that those who receive a degree must possess in common certain

basic principles, concepts, and methodologies both unique to and shared by the various disciplines. College-educated persons must be able to use their knowledge to evaluate and appreciate the physical environment, the culture, and the society in which they live. In addition, they must have a good self-understanding and the capacity to adapt to an ever-changing and global environment through an ongoing intellectual curiosity and commitment to life-long learning.

Upon successful completion of all of the General Education requirements, students will be able to:

- Understand the modes of inquiry and critique used in the natural, social, and behavioral sciences and the humanities
- Understand and appreciate the role of culture and the arts in society and in one's personal life
- Think logically and communicate effectively
- Understand and adopt the concepts of personal health and fitness to enhance the quality of life
- Recognize the multitude of diversities in the physical and human environments and how these diversities impact individuals and society
- Understand the connections among the various disciplines
- Use a variety of means to find information, examine it critically, and apply it appropriately
- Work ethically and effectively with others
- Apply the skills necessary for successful living in an ever-changing and global environment
- Become productive workers and life-long learners

To meet the objectives of general education

A. Courses in the natural sciences are those that help students examine the physical universe, its life forms, and its natural phenomena; develop an understanding and appreciation of the scientific methods; and encourage an understanding of the relationships between science and other human activities.

B. Courses in the social and behavioral sciences are those which focus on people as members of society; develop an awareness of the method of inquiry used by the social and behavioral sciences; stimulate critical thinking about the ways people act and have acted in response to their societies; and promote appreciation of how societies and social subgroups operate.

C. Courses in the humanities are those which study the cultural activities and artistic expressions of human beings; develop an awareness of the ways in which people throughout the ages and in different cultures have responded to themselves and the world around them in artistic and cultural creation; develop aesthetic understanding and an ability to make value judgments.

D. Courses in language and rationality help students develop principles and applications of language toward logical thought, clear and precise expression and critical evaluation of communication in whatever symbol system the student uses.

E. Courses in health and physical education help students develop the understanding and the skills necessary to maintain a healthful life.

F. Courses in ethnic and women's studies help students develop an awareness of the diverse historical roots and an appreciation of the cultural contributions of minorities and women; lead to an understanding of the causes and consequences of socio-economic inequality based on race, sex or ethnicity; and explore ways of eliminating such inequities.

Graduation Application Procedures

Students may apply for graduation by scheduling a counseling appointment to submit an application for graduation. The student may elect to be either a Fall graduate, a Spring graduate, or a Summer graduate, depending upon the completion of all necessary graduation requirements. However, formal graduation ceremonies are conducted only at the conclusion of each academic year. The deadline dates for submission of graduation applications are printed in the Moorpark College Schedule of Classes.

Major Requirements under which a Student Graduates

A student remaining in continuous attendance and pursuing the same major at MC may elect to meet the major in effect either at the time of his or her entering the major, or at the time of his or her graduation from MC. This policy applies only to the requirements for course in a major (Certificates of Achievement and designated Associated degrees) and does not apply to general education requirements.

Variance in Major Requirements

Occasionally a student may have difficulty in completing exact major requirements as specified in the MC catalog due to circumstances beyond control of the student. Under exceptional circumstances, a student may file a Petition for Substitution or Waiver to seek approval from the appropriate college officials to substitute courses in designated major or in general education. The petition forms are available in the Counseling Center.

Guidelines for Additional Degree

1. A student who has earned an associate degree at any regionally accredited institution may earn an additional associate degree.
2. A student who holds a higher degree from any regionally accredited institution may earn an associate degree in a specific major (this excludes the Associate in Arts in general liberal arts and sciences).
3. General education requirements earned for one degree may be applied toward another degree.

LICENSE/PERMIT PREPARATIONS

Successful completion of course(s) prepares students to take necessary exams

4. A candidate for an additional degree must complete 12 or more units of credit, in residence at Moorpark College, concurrent with or after completion of requirements for the first associate degree. In addition, a candidate must be in attendance at MC in the semester during which graduation requirements for the additional degree are completed.
5. A student must complete all the required courses listed in the catalog for the specific majors. In the event that unmet requirements for a specific major do not total 12 units, a student must complete the remaining units from electives listed under the major or courses as approved by the appropriate division.
6. In the case of degree offering two or more options, a student may earn an additional degree within the same filed by completing the requirements for that option (the additional degree) and all other requirements specified herein.

Appeals to the above policy may be submitted on a petition available in the Counseling Office for approval by the Executive Vice President of Student Learning. Waivers may be granted under extenuating circumstances or when there has not been sufficient opportunity to enroll in required courses.

Certificates of Achievement

A certificate of Achievement will be granted in specific vocational areas to any student who meets the following requirements:

1. **Scholarship** – A cumulative grade point average of not less than 2.0 in all college and university work attempted.
2. **Major** – Completion of all courses required in a curriculum specific in the college catalog
3. **Residency** – Completion of at least 12 semester units in residence at the college granting the certificate.

Certificates of Completion

Instructional divisions may award Certificate of Completing to students who have satisfactorily completed a course or a sequence of courses designed to lead them to specific types of employment or to an upgrading of skills..

Transfer Information

Preparation for Transfer

Students planning to transfer to a four-year university have a wide variety of options. The California State University (CSU) with 23 campuses, the University of California (UC) with 9 campuses and over 70 private, independent colleges in California provide a wide range of academic programs, physical and academic environments, and social climates. Moorpark College offers the equivalent of the first two years of these four-year college and university degrees.

Students who are preparing to transfer are strongly encouraged to balance their studies by taking both general education courses and lower division major courses. Completing only general education courses, especially for high unit majors, such as business administration, natural sciences, math or engineering, may not be in a student's best interest. Additional coursework may be completed as elective courses, to complement or supplement a major course of study.

Academic counseling is available to all students on an appointment basis. Each counselor is a specialist in several academic areas, and you may wish to see a counselor according to the major you declare. All counselors have the expertise to assist you with course selections, program planning, questions concerning requirements for admission, general education, majors and transfer to a four-year college or university. Students are encouraged to meet with a counselor as early as possible to discuss their educational plan.

Transfer Admission Agreement (TAA)

What is a Transfer Admission Agreement (TAA)?

A TAA is a formal, written agreement that outlines the courses a student must complete before transferring, states the grade-point average you must earn, (differs from college to college) and lists specific requirements for selective majors. Once it has been determined that a student is eligible to transfer to the University as a junior and that they meet the TAA criteria for their major, their Moorpark College counselor will start the process. A TAA is usually written after a student has completed 30 transferable units, normally up to one year prior to transfer. It is important that a student wishing to transfer under a Transfer Agreement begins working with a counselor in his/her major as soon as possible to carefully plan academic work.

Moorpark College students can explore TAA/TAGs with the following Universities: UC Davis, UC Irvine, UC Los Angeles (under the Transfer Achievement Program), UC Merced (in progress), UC Riverside, UC San Diego, UC Santa Barbara, UC Santa Cruz, CSU Channel Islands, CSU Northridge, CSU San Bernardino, CSU Sonoma, California Lutheran University.

Articulation with Four-Year Institution

To assist the student with transfer to four-year institutions, articulation agreements have been established with most California State University, University of California campuses and some independent California colleges and out-of-state institutions. These agreements define the courses at MC that satisfy General Education and many lower division major requirements at four-year institutions. A list of general education and major preparation courses for most California public four-year institutions can be found on ASSIST.

ASSIST

Articulation System Stimulating Interinstitutional Student Transfer (ASSIST) is a computerized student-transfer information system that can be accessed over the World Wide Web. It displays reports of how course credits earned at one California college or university can be applied when transferred to another. ASSIST is the official repository of articulation for California's colleges and universities and therefore provides the most accurate and up-to-date information available about student transfer in California. ASSIST is available at www.assist.org.

Lower-Division Transfer Patterns (LDTP)

The Lower-Division Transfer Pattern (LDTP) project, sponsored by the California State University (CSU) and supported by the California Community Colleges, presents potential transfer students with the most direct path to a bachelor's degree in the CSU system. Community college students who elect to follow the LDTP option will receive the highest priority for admission to a CSU campus. Students will be asked to complete successfully a specified set of general education courses and major courses that will be common to all CSU campuses offering that major, and they will be asked to complete successfully an additional set of courses identified by the particular CSU campus named in the LDTP agreement. For more information on the CSU LDTP, schedule an appointment with a Moorpark College counselor at (805) 378-1428.

CAN

The California Articulation Number System (CAN) is a statewide numbering system independent from course numbers assigned by local colleges. A CAN number indicates that participating California colleges and universities have determined that courses offered by other campuses are equivalent in content and scope to courses offered on their own campuses regardless of their unique titles or local identifying numbers. Thus, if a schedule of classes or catalog lists

Career, Graduation and Transfer

a course bearing a CAN number, students on one campus can be assured that it will be accepted “in lieu of” the comparable CAN course noted in the catalog or schedule of classes of another campus. For example, CAN ECON 2 on one campus will be accepted as meeting the requirement of the designated CAN ECON 2 course on other participating community college or university campuses.

The CAN numbering system is useful for student attending more than one community college and is applied to many of the transferable, lower division courses students need as preparation for their intended major. Because these course requirements may change, however, and because courses are continually being redefined, qualified for or deleted from the CAN databases, students should always check with their campus’ counselors, or the articulation officer to determine how CAN designated courses fit into their educational plans for transfer.

Below is a list of CAN qualified courses for Moorpark College

**NOTE: CAN has been discontinued by the California Community College System Office. Students currently enrolled in CAN courses will be able to finish their work as planned; The program will remain in effect for students currently participating in the process until 2009. Please check with the Counseling Department for additional information.*

Transfer Admission Requirements to: *University of California (UC)*

There are several ways to meet the University's minimum admission requirements for transfer students, as described below. The path you use depends upon the degree to which you satisfy UC's minimum eligibility requirements for freshmen at the time of graduation from high school.

1. If you were eligible for admission to the University when you graduated from high school, meaning you satisfied the Subject, Scholarship and Examination requirements, or were identified by the University during the senior year in high school as being eligible under the Eligibility in the Local Context (ELC) program you are eligible to transfer if you have a C (2.0) average in your transferable college coursework.
2. Students who met the Scholarship Requirement but who did not complete all the Subject Requirements must take appropriate transferable college courses in the missing subjects and earn a C or better in each course as well as an overall C average (2.0) in transferable courses.
3. Students who were not eligible for the University of California from high school because they did not meet the Scholarship Requirement must:
 - (a) Complete 60 transferable semester units with a grade point average of at least 2.8 for non-resident students, and
 - (b) Complete the following course pattern, earning at least a C (2.0) or better in each course:
 - two transferable college courses in ENGLISH Composition; and
 - one transferable college course in mathematical concepts and quantitative reasoning; and
 - four transferable college courses (3 semester units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, the physical and biological sciences.

All campuses require that students complete English composition and math by the end of the spring term prior to fall transfer. Some campuses also require that the 60 semester units minimum be completed no later than the spring semester.

Career, Graduation and Transfer

Students who satisfy the Intersegmental General Education Transfer Curriculum (IGETC) prior to transferring to UC will automatically satisfy option 3B above.

(Source: *Introducing the University of 2007/2008*; *University of California Quick Reference for Counselors 2006/2007*).

Intersegmental General Education Transfer Curriculum (IGETC) – 2007-08

General education requirements are designed to give University undergraduates a broad background in all major academic disciplines. Each school and college at every UC campus has its own general education requirement. Students can also have the option of completing the Intersegmental General Education Transfer Curriculum (IGETC).

The IGETC is a series of courses that community college students can use to satisfy lower-division general education requirements at any CSU or UC campus. Completion of the Intersegmental General Education Transfer Curriculum will permit a student to transfer without the need, after transfer, to take additional lower-division general education courses to satisfy campus specific General Education requirements.

The IGETC is not an admission requirement for transfer to a CSU or UC, nor is it the only way to fulfill the lower-division general education requirements of the CSU or UC. Students may find it advantageous to take courses fulfilling CSU's (campus specific) general education requirements or those of a particular UC campus. *See your counselor for advice on your particular educational goal.*

* Courses listed in more than one area shall not be certified in more than one area.

○ Transfer credit may be limited by either UC or CSU or both. Please consult with a counselor for additional information.

□ Both courses must be taken for certification.

(L) Designates courses with a laboratory.

Grades for IGETC

All courses in the IGETC must be completed with a "CR" (Credit) or grade of "C" or better.

Full IGETC Certification

For certification, IGETC must be completed prior to transfer. Certification of these units is not automatic and certification must be requested at the MC Counseling Office after the student completes all of the IGETC requirements. Certification will not be made when course are still in progress or before grades are known.

Partial IGETC Certification

It is expected that all students using IGETC as their general education pattern will have completed it prior to transfer. However, partial certification may be requested if severe hardship (MUST be documented) prevented the student from completing all required courses. Hardship may be determined to be: (1) accident or illness in the FINAL semester at Moorpark College; (2) work schedule changes in the FINAL semester at MC; (3) course cancellation by the college in the FINAL semester; (4) documented counselor error. Area 1 and Area 2 CANNOT be completed after transfer.

If any of the above exceptions or situations applies to your academic record, please consult with a Moorpark College counselor for more information.

Double-Counting

Even though a course may be listed in more than one area on IGETC, a course may only be counted in one area. UC will allow requirements completed as preparation for the major to be used in the IGETC wherever they appear. In addition, courses used to satisfy the U.S. History, Constitution and American Ideals requirements cannot be used to double count on the IGETC.

Quarter Units vs. Semester Units

Students with both quarter and semester unit course work may find it difficult to combine the two in order to complete the required number of units. Additional course work may be necessary in order to accumulate the required number of courses or units in certain IGETC areas. Please meet with a counselor for assistance.

Courses Completed at Other Colleges

Courses completed at any regionally accredited college can be used. However, the majority of courses used to complete IGETC requirements must be taken at a California community college. Course work from other California community colleges will be applied in the IGETC category listed from that campus. Courses must have been on that college's IGETC list when the course was taken. Students transferring from other than a California community college may have course certified as equivalent to Moorpark College courses if an equivalent course is taught at Moorpark College. Such courses would be placed in the same IGETC category as the equivalent Moorpark College course. There are some restrictions about using courses from a CSU or UC to fulfill IGETC.

Courses Taken at Foreign Institutions

These courses will not be permitted for certification on the IGETC.

AP Scores for IGETC certification

AP scores of 3, 4 or 5 can be used to satisfy any IGETC subject area except the Critical Thinking/English Composition or the Oral Communication requirements (Area 1B & C). Each AP score can only be used as one course. The AP course must have been evaluated and approved by Moorpark College faculty. A list of faculty-approved Advanced Placement scores and equivalent courses is available from a Moorpark College counselor.

California State University Transfer Requirements

The CSU guarantees admission to the CSU system to all California community college (CCC) students who meet CSU upper division transfer admission requirements. Effective Fall 2005, students with fewer than 60 transferable semester (90 quarter) units are considered lower division transfer students, and those with 60 or more transferable semester (90 quarter) units are considered upper division transfer. The CSU assigns the highest priority for admission to CCC transfer students who have completed 60 semester transferable units.

Upper Division Transfer (60 to 70 semester units)

Students may qualify for admission if they:

- Completed 60 semester (90 quarter) units
- Have completed or will complete prior to transfer at least 30 semester (45 quarter) units selected from courses in English, Arts and Humanities, Social Sciences, Science, and a CSU GE approved mathematics course.
- Have a college GPA of 2.0 or better (2.4 for non-California residents) in all transferable college units completed.

No more than 1.5 units of the 3-unit Area E requirement can be met by a dance or physical education activity course.

Full Certification

Completion of all five sections (A-E) of these requirements prior to transferring will permit MC to certify to each of the CSU campuses that you have fulfilled the basic 39-unit minimum lower division requirement in general education. Each of the campuses of CSU requires an additional nine units of upper division GE work in residence; some campuses may require more than the 48-unit minimum. Certification is not automatic and must be requested by the student.

Partial/Subject Area Certification

It is possible to complete separately any of the areas or sections (A-E) at MC and receive partial certification in any or several of those areas if you are not fully certified, it will be necessary for you to complete the remaining areas (and perhaps other areas) after transferring as defined by the catalog of the transfer school.

Course Restriction

While a course may satisfy more than one general education group and/or area requirement, it shall not be counted more than once and any excess units in one area shall not apply to another area.

U.S History, Constitution and

American Ideals Requirements

All campuses require students to complete college-level coursework in U.S. History, American and California Government. Courses approved to satisfy this requirement are specified in the appropriate areas and most may be double-counted toward satisfying General Education Breadth requirements.

Sequential Courses

Most institutions recommend that students complete sequential courses at the college where the series was started. This is especially recommended for a sequence of two or more courses which require the preceding course(s) as a prerequisite to advancement.

Advanced Placement Examinations in CSU

General Education-Breadth Certification

The following Advanced Placement examinations may be incorporated into certification of completion of CSU General Education-Breadth requirements.

Students must have scored 3, 4, or 5 on an Advanced Placement examination listed below to receive the credit indicated. All CSU campuses will accept the minimum units shown below toward fulfillment of the designated General Education-Breadth area if the examination is included in a full or subject-area certification; individual CSU campuses may choose to accept more units than those specified below towards completion of General Education-Breadth requirements. The CSU campus to which the student is transferring determines the total number of units awarded for successful completion of an Advanced Placement examination to the graduation requirements.

Private or Out-of-State Schools

Students who are planning to enter one of California's many private four-year schools or an out-of-state public or private school should carefully check the transfer requirements for that particular school and consult a counselor to determine the coursework needed to meet GE requirements at that institution. Articulation agreements for some local universities can also be found at www.aiccu.edu. Below is the admission and general education requirements for University of Southern California (USC) and California Lutheran University.
