

BIOLOGICAL SCIENCES

Biology courses at Oxnard College introduces the student to gross anatomy, histology of human organ systems, the basic principles of molecular and cellular biology, lower division biochemistry which offers the study of biochemical and cellular design and the regulation of that metabolism. Basic laboratory techniques are employed for plant and animal tissue, organ culture preparation and virus cultivation. Directed Studies furthers the knowledge of Biology on an independent study basis.

An Associate in Arts Degree in Biology is offered. Career opportunities (most careers require a bachelor and advanced degree) include Biological Technician, Health Technician, Clinical Lab Technologist, Environmental Policy, Zoology, Public Health Biologist, Laboratory Technician, Research Technician, Forestry & Wildlife Biology, Ecology and Fisheries.

Career Opportunities

(Most careers require a bachelor and advanced degree)

Biological Technician	Public Health Biologist
Health Technician	Laboratory Technician
Clinical Lab Technologist	Research Technician
Marine Biology	Forestry & Wildlife Biology
Environmental Policy	Ecology
Biotechnology	Fisheries
Zoology	

Faculty

Full-Time

Michael Abram	Lorraine Buckley
Shannon Newby	Louise Zitnik

Part-Time

Nicholaas Boshoff	Dyan Cole
Joe Frantz	Kimberly Jesu
Regina Migler	Cori Newton
Michael Nicholson	Jan Schienle
Neil Ziegler	

◆ Biology

Associate in Arts Degree

Core Courses:		Units
BIOL R120	Principles of Biology I	4
BIOL R120L	Principles of Biology I Lab	1
BIOL R122	Principles of Biology II	4
BIOL R122L	Principles of Biology II Lab	1
BIOL R199	Directed Studies in Biology	2

Required Units from Core Courses 12

Elective Courses: Units

Students must select at least 15 units from Group A and at least 13 units from Group B.

Group A:

CHEM R120	General Chemistry I	5
CHEM R122	General Chemistry II	5
CHEM R130	Organic Chemistry I	5
MATH R105	Introductory Statistics	4
MATH R120	Calculus with Analytic Geometry I	5
MATH R121	Calculus with Analytic Geometry II	5
PHYS R131	Physics for Scientists & Engineers 1	5
PHYS R132	Physics for Scientists & Engineers 2	5

Group B:

BIOL R130	Biochemistry	3
BIOL R135	Molecular Biology	3
BIOL R135L	Molecular Biology Laboratory	2
BIOL R140L	Tissue Culture Laboratory	3
BIOL R145L	Applied Microbiology Laboratory	3
BIOL R150L	Biotechnology Laboratory	3
BIOL R170	Biological Marine Resource Management	1
MICR R100	Principles of Microbiology	3
MICR R100L	Principles of Microbiology Lab	2
PHSO R100	Human Physiology	3
PHSO R100L	Human Physiology Lab	2

Required Units from Elective Groups A & B 28

Total Required Units 40

Anatomy Courses

ANAT R100—General Human Anatomy 2 units

Prerequisites: BIOL R101 or BIOL R120.

2 hours lecture weekly

This course is an introduction to gross anatomy as well as organization and histology of human organ systems. It is appropriate and meets the requirements for students anticipating transfer to medical school, dental school or other health care and kinesiology programs. This course is fundamental for students entering studies in most general biology fields. Field trips may be required. Formerly BIOL 111. (2)

Transfer credit: UC, CSU (CAN: BIOL 10 (ANAT R100 + R100L))

ANAT R100L—General Human Anatomy Laboratory 2 units

Prerequisites: BIOL R101 or BIOL R120.

Corequisites: ANAT R100.

6 hours lab weekly

This is a laboratory course to accompany ANAT R100. Laboratory experiments and demonstrations will be used to illustrate the principles and concepts of anatomy. Experiments include but are not limited to laboratory dissection of the cat and demonstration of the dissected human cadaver. Field trips may be required. Formerly BIOL 111L. (2)

Transfer credit: UC, CSU (CAN: BIOL 10 (ANAT R100 + R100L))

ANAT R101—General Human Anatomy 4 units

Prerequisites: BIOL R101 or BIOL R120.

2 hours lecture, 6 hours lab weekly

This course is organized into two parts: lecture and laboratory. The lecture portion is an introduction to gross anatomy as well as organization and histology of human organ systems. The laboratory portion reinforces the lecture material and consists of hands-on experiments and demonstrations used to illustrate the principles and concepts of anatomy. These include but are not limited to microscope use, model and specimen examination, dissection of the cat as well as other livestock organs and demonstration of the dissected human cadaver. This course is appropriate and meets the requirements of students anticipating transfer to university, medical school, dental school, holistic medicine, kinesiology programs and other health care certificated programs. Field trips may be required. Formerly ANAT R100 and ANAT R100L. (2)

Transfer credit: UC, CSU (CAN: BIOL 10)

Biology Courses

BIOL R100—Marine Biology 3 units

3 hours lecture weekly

This survey course includes an introduction to ecology, organism identification, anatomy, physiology, and conservation of marine organisms. Applications of the scientific method in marine biology are emphasized. Field trips may be required. Formerly BIOL R116. (Same as MST R100) (2)

Transfer credit: UC, CSU

BIOL R100L—Marine Biology Laboratory 1 unit

Prerequisites: BIOL R100 or concurrent enrollment.
3 hours lab weekly

This survey course includes laboratory and field studies of marine organisms and their environment, the use of the scientific method, and basic biological skills. Optional field trips may be required. Formerly BIOL R116L. (Same as MST R100L.) (2)

Transfer credit: UC, CSU

BIOL R101—General Biology 3 units

3 hours lecture weekly

This is a survey course that presents the major principles and phenomena governing biological systems. Topics include biological chemistry, the cellular basis of life, metabolism, nutrition, reproduction, genetics, DNA modification, evolution and recombinant DNA technologies. This course is designed for non-biology majors. It will satisfy the requirements for certain dental hygiene, nursing and physical therapy programs. Field trips may be required. Formerly BIOL 100A.

Transfer credit: UC, CSU

BIOL R101L—General Biology Laboratory 1 unit

Prerequisites: BIOL R101 or concurrent enrollment.
3 hours lab weekly

This is a laboratory course designed to be taken in conjunction with BIOL R101. The laboratory exercises deal with the scientific method, basic biochemistry, microscopy, cellular organization, cellular energy transformation, molecular genetics and evolution. Field trips may be required. Formerly BIOL 100AL. (2)

Transfer credit: UC, CSU

BIOL R120—Principles of Biology I 4 units

Prerequisites: CHEM R120.
4 hours lecture weekly

The principles of molecular and cellular biology are presented. An emphasis will be placed on the diversity of organisms. This course is designed for biological science majors. It is intended to fulfill the requirements for the first year of the biology curriculum and to prepare students entering related science curricula. It is not intended for non-majors. Field trips may be required. Formerly BIOL 101.

Transfer credit: UC, CSU (CAN: BIOL 2 (BIOL R120 + R120L))

BIOL R120L—Principles of Biology I Lab: Intro to Cellular and Molecular Biology 1 unit

Prerequisites: BIOL R120 or concurrent enrollment.
3 hours lab weekly

This is a laboratory course designed to complement BIOL R120. The current methods employed by investigators in the biological sciences are presented. These include, but are not limited, to microscopy, differential centrifugation, chromatography, electrophoresis, spectrophotometry and nucleic acid hybridization. This course is recommended for biological sciences majors seeking transfer to university programs as well as students anticipating careers in a broad range of health care professions. Field trips may be required. Formerly BIOL 101L. (2)

Transfer credit: UC, CSU (CAN: BIOL 2 (BIOL R120 + R120L))

BIOL R122—Principles of Biology II 4 units

Prerequisites: BIOL R120 and BIOL R120L.
4 hours lecture weekly

This course is designed to complete the study of basic principles of biology for biological science majors. Topics include the diversity and evolutionary relationships of the major plant divisions and animal phyla. Emphasis is placed on evolution of as well as the development, structure and functions of vertebrate organ systems. Ecosystem structure, population ecology and evolutionary concepts are presented. Field trips may be required. Formerly BIOL 102.

Transfer credit: UC, CSU

BIOL R122L—Principles of Biology II Lab 1 unit

Prerequisites: BIOL R120 and BIOL R120L or equivalent; BIOL R122 or concurrent enrollment.
3 hours lab weekly

This course is designed to complete the study of basic principles of biology laboratory for biological science majors. Topics include the diversity and evolutionary relationships of the fungi, major plant divisions, and animal phyla. Dissections of representative organisms are required. Emphasis is placed on the development, structure and functions of vertebrate organ systems. Ecosystem structure, population ecology, and evolutionary concepts are presented. Field trips may be required. Formerly BIOL 102L. (2)

Transfer credit: UC, CSU

BIOL R170—Biological Marine Resource Management 1 unit

Corequisites: GEOL R178.
3 hours lab weekly

Topics in marine biology related to current resource management issues in this region. Study of requirements and applications of federal, state, and local laws and regulations related to marine resource management. Application of the scientific method to questions about marine resources. Field trips will be to natural areas where geological, biological, and oceanographic interactions can be observed. Course may be taken four times. (Same as MST R170) (2)

Transfer credit: CSU

BIOL R198A-Z—Topics in Biology ½-10 units

Lecture and/or lab hours as required by unit formula

Designed to meet specific needs of college and community, as required and requested by persons whose needs in this area are not met by present course offerings. (2)

Transfer credit: CSU

BIOL R199—Directed Studies in Biology 1-3 units

Lecture and/or lab hours as required by unit formula

Designed for students interested in furthering their knowledge of Biology on an independent study basis. All studies will require laboratory and library research, as well as written reports. Course may be taken two times.

Transfer credit: CSU

NOTE: The courses listed below have been temporarily suspended. For further information, please contact the Math, Science, Health & Athletics division office.

BIOL R098	Short Courses in Biology
BIOL R106	The Human Environment
BIOL R106L	Human Environment Laboratory
BIOL 109	Plant and Animal Communities of California
BIOL R130	Biochemistry
BIOL R135	Molecular Biology
BIOL R135L	Molecular Biology Laboratory
BIOL R140L	Tissue Culture Laboratory
BIOL R145L	Applied Microbiology Laboratory
BIOL R150L	Biotechnology Laboratory

Botany Courses

NOTE: The courses listed below have been temporarily suspended. For further information, please contact the Math, Science, Health & Athletics division office.

BOT R100	Principles of Botany
BOT R100L	Principles of Botany Laboratory

Microbiology Courses

MICR R100—Principles of Microbiology 3 units

Prerequisites: BIOL R120 or both ANAT R100 and PHSO R100.

3 hours lecture weekly

This course is an introduction to the structure and metabolic activities of bacteria, fungi, algae, protozoa and viruses. The topics will include distribution, molecular genetics and the physical/chemical methods used in microbial control. The principles of disease transmission, prevention and immunity will also be presented. Field trips may be required. Formerly BIOL 110. (2)

Transfer credit: UC, CSU (CAN: BIOL 14 (MICR R100 + R100L))

MICR R100L—Principles of Microbiology Laboratory 2 units

Prerequisites: MICR R100 or concurrent enrollment.

6 hours lab weekly

This is a laboratory course designed for biological science majors and students interested in the health science professions. The exercises are intended to give the students experience in the manipulation of microorganisms and exposure to current microbial techniques. Topics covered will include microscopy, prokaryotic cell structure, microbial metabolism, distribution and genetics. Formerly BIOL 110L. (2)

Transfer credit: UC, CSU (CAN: BIOL 14 (MICR R100 + R100L))

Physiology Courses

PHSO R100—Human Physiology 3 units

Prerequisites: CHEM R110, ANAT R100 & ANAT R100L.

Corequisites: PHSO R100L.

3 hours lecture weekly

This course emphasizes principles of cellular and systemic functions of the human body. Lecture topics include scientific method, basic inorganic and organic chemistry, solute as well as water transport and balance, homeostatic mechanisms, and functions of the major organ systems. This course satisfies requirements for general education as well as transfer to universities and is required for health-care and certificated programs. Field trips may be required. Formerly BIOL 112.

Transfer credit: UC, CSU (CAN: BIOL 12 (PHSO R100 + R100L))

PHSO R100L—Human Physiology Laboratory 2 units

Prerequisites: CHEM R110, ANAT R100 & ANAT R100L.

Corequisites: PHSO R100.

6 hours lab weekly

This course emphasizes demonstrations and techniques of commonly utilized laboratory equipment. Lab will primarily consist of analysis, interpretation and evaluation of data gathered relating to homeostatic mechanisms, functions of the major organ systems and disease. Experiments reinforce material presented in lecture. This course satisfies requirements for general education as well as transfer to universities and is required for health-care and certificated programs. Field trips may be required. Formerly BIOL 112L.

Transfer credit: UC, CSU (CAN: BIOL 12 (PHSO R100 + R100L))
